

MEMORY BANK

SPECIALIST DISTRIBUTOR
FOR TECHNOLOGY PRODUCTS

Memory Bank is an authorised distributor,
specialising in Datacentre Infrastructure
products, supplying Irish IT Resellers

About Us

Memory Bank is one of Ireland's foremost IT trade only Distributors, supplying Resellers across the country.

We have a clear and growing focus specialising on Ireland's ever-increasing proliferation of Data Centres - Memory Bank's range of products and solutions encompass virtually all of your IT requirements.

From Switches, Racks, Memory, Encrypted SSD, UPS, PDU, Cables to Privacy Filters - an IT Distributor that can be trusted to deliver technologies from the best in breed IT Vendors.

Product Portfolio

Our established product portfolio includes technologies from:

WHAT WE DO

- ✓ Dedicated, honest & reliable service
- ✓ Quick turnaround on all quotes & order updates
- ✓ Flexible delivery options
- ✓ Credit terms
- ✓ Pre and post sales and technical advice
- ✓ Assist you in progressing through the Vendor Programmes
- ✓ Marketing support
- ✓ End user leads
- ✓ Training & tools
- ✓ Absolute channel commitment

3M Overview

3M Privacy Products help protect confidential information from visual hackers.

Help keep login credentials, payroll information and other sensitive data private with 3M™ Privacy Products. Innovative technology from 3M prevents visual hackers from stealing sideways glances at your screen, while providing a crisp, clear view for intended users.

Featuring ingenious microlouver technology “blacks out” side views, crisp, clean image clarity when directly in front of the screen and available for most devices, brands and screen sizes.

3M Products – Privacy Filters for Monitors

Framed Black Privacy Filters

One of our most popular privacy products. Easy to remove for collaboration, sharing or to clean as needed. You get crisp image clarity on your screen, while visual hackers with side views are kept in the dark.

Privacy when it counts

Ingenious microlouver technology delivers world-class effective privacy. Side views are “blackened out” from prying eyes while your screen remains clearly visible to straight-on views.

Maintain the quality of your display

Helps reduce reflections so you see your screen with the beautiful high-contrast, high-resolution quality you expect.

Protect your screen

Gives screens a layer of added protection from dust and scratches.

High Clarity Privacy Filters

Help protect the information displayed on your screen and maintain the high-resolution clarity of your display. You get incredibly crisp image clarity with a glossy finish while visual hackers with side views are kept in the dark.

Enhanced clarity

Perfectly suited for most of today’s high-resolution monitors and displays, high clarity filters provide premium privacy while maintaining the beautiful high-contrast, high-resolution image you expect.

Privacy when it counts

Ingenious microlouver technology delivers world-class effective privacy. Side views are “blackened out” from prying eyes while your screen remains clearly visible to straight-on views.

Gold Privacy Filters

Incredible clarity for the users, while people on either side see a vivid golden shield.

Privacy you can’t ignore

Projects a vibrant gold shield to prying eyes from the side, while you get incredible clarity, so your confidential information is visible only to you.

Maintain the quality of your display

Gold filters provide a beautiful high-contrast, high-resolution quality you expect.

Gold or glossy black

The proprietary gold effect provides premium privacy with a glossy finish. Flip the reversible filter for a glossy black screen.

Black Privacy Filters

Our world-class privacy filter helps protect the confidential and sensitive information on your monitor from the side-views of visual hackers.

Privacy when it counts

Ingenious microlouver technology delivers world-class effective privacy. Side views are “blackened out” from prying eyes while your screen remains clearly visible to straight-on views.

Maintain image quality of your display

Helps reduce reflections so you see your screen clearly with pristine image clarity.

3M Products – Privacy Filters for Laptops

Gold Privacy Filters

The highest level of clarity in 3M™ Privacy Products for laptops. Help protect the information displayed on your screen while in the office or in public places like airports and coffee shops. You see your screen clearly while people on either side see a vivid golden shield.

Privacy you can't ignore

Projects a vibrant gold shield to prying eyes from the side, while you get incredible clarity, so your confidential information is visible only to you.

Maintain the quality of your display

Gold filters provide a beautiful high-contrast, high-resolution quality you expect.

Gold or glossy black

The proprietary gold effect provides premium privacy with a glossy finish. Flip the reversible filter for a glossy black screen.

Black Privacy Filters

World-class “black out” filter keeps your personal and sensitive information protected from the side-views of prying eyes when you're at the office or in public places like the airport and coffee shops.

Privacy when it counts

Ingenuous microlouver technology “blacks out” side views from prying eyes, so your confidential information is clearly visible only to you.

Proven image clarity

See your screen clearly with crisp, clear image clarity, while keeping visual hackers in the dark.

Thin, light, durable

Thin, flexible, yet rigid design adds an extra layer of durable protection from everyday scratches and dust.

Black Privacy for Touch Laptops

With improved touch sensitivity, our super slim privacy filters not only look great, but provide the performance you expect for your touchscreen device.

Privacy when it counts

Ingenuous microlouver technology delivers world-class effective privacy. Side views are “black out” from prying eyes while your screen remains clearly visible to straight-on views.

Ultra thin, ultra responsive

Thinner and more responsive to touch than ever offered before from 3M, giving you protection from visual hackers without getting in the way of using your device. It almost feels like nothing's there.

Smooth matte finish

Fingers slide and swipe easily across the satin-like surface, just like on your touchscreen. Matte finish helps reduce irritating glare and light reflections, and hides fingerprints.

3M Products – Privacy Filters for Tablets & Smartphones

Black Privacy Filters for Tablets

Easy to attach, remove and reattach, so you can help keep your tablet screen private from the side-views of visual hackers and share your screen when you want to.

Privacy when you need it

Attach the filter to “black out” side views in public places, and easily remove the filter when you need to share content on your screen.

Ultra thin, ultra responsive

Thinner and more responsive to touch than ever offered before from 3M, giving you protection from visual hackers without getting in the way of using your device. It almost feels like nothing's there.

Smooth matte finish

Fingers slide and swipe easily across the satin-like surface, just like on your touchscreen. Matte finish helps reduce irritating glare and light reflections, and hides fingerprints.

Black Privacy Screen Protectors

Stay on the go, while helping keep your screen protected and your confidential texts, emails, calendars and alerts, well, confidential.

Privacy when you need it

Maintain “black out” visual privacy from side views in portrait mode, or change the orientation to landscape when you want to share your screen.

A “clear” winner

Designed for optical clarity. You get a clear view of your screen while prying eyes to the side see a darkened screen.

Durable screen protection

Adds an extra layer of protection from everyday scratches and dust. Stay-clean edge technology helps prevent dust and grime from collecting on the edges of the screen protector.

Austin Hughes Overview

Manufacturing a broad range of solutions based around 19 inch rack mount technology.

Austin Hughes produce the highest quality rack mount power distribution and power monitoring solutions. To help manage datacentre power capacity, reduce downtime and energy costs and improve energy efficiency.

All Austin Hughes Solutions are configured and supported from their UK facility and are offered on short lead times into mainland Europe, Middle East and Africa.

CyberView

Austin Hughes wide range of LCD Console Trays with integrated KVM solutions enable datacentre to access multiples servers at one time. Available on the shortest lead-times in the European market today whilst ensuring capital equipment and software management costs are kept to an absolute minimum.

InfraGuard

For data centres and server rooms the ability to remotely manage the cabinet environment is vital. InfraGuard features include switching and monitoring of PDUs, door and side panel alarms, control of cooling fans, monitoring of temperature and humidity, as well as smoke, shock, and water alarms.

InfraSolution

Rack level access security has become critically important for all datacentre and server rooms. More and more IT managers have recognised this need and upgraded their racks with smartcard access control. InfraSolution provides datacentre managers a complete networked solution with monitoring, control, alarm & reporting.

InfraCool

Rack airflow solutions to control temperatures and protect your critical equipment. Cost effective solutions designed to provide cooling as an integral part of the rack including Door Mounted Fan Tray, 19-inch Fan Trays and Raised Floor Mounted Fan Trays.

InfraPower

Help your customer lower energy consumption, make more informed capacity planning decisions and improve operational and energy efficiency. InfraPower locally metered, remotely monitored and switched rack PDUs are designed for use across the network, either locally via SNMP or over IP.

UltraView

The UltraView series is designed for dedicated professional applications. The wide range of models in this series offers benefits for different levels of display quality. With customisation options such as screen size, casing dimming and touchscreen.

Eaton Overview

For more than 50 years, Eaton has been safeguarding the critical systems of businesses across the globe. Whether protecting a single desktop or the largest datacentre, Eaton solutions provide clean, uninterrupted power to keep mission-critical applications working. We offer a comprehensive range of environmentally-sensitive, efficient, reliable UPSs, surge protective devices, power distribution units, remote monitoring, meters, software, connectivity, enclosures, airflow management and professional services to every business segment, including datacentres, retail outlets, healthcare organisations, government agencies, manufacturing firms, broadcasting companies, financial institutions, and a wide range of other applications.

PC, Workstation and Home UPS

Eaton Protection Box 1, 5 and 8

- Surge protection compliant with IEC 61643-1 standard
- Up to 8 local outlets
- Dataline protection (on Tel models)
- PLC-ready outlet

Eaton Protection Station

Standby topology (off-line). 500/650/800VA.

- Up to 30 minutes battery backup
- Up to 8 local outlets
- Advanced surge protection compliant with IEC 61643-1 standard
- EcoControl function (650/800 models): Up to 30% energy saving
- USB port and Eaton UPS Companion as standard (650/800 models)

Eaton 3S

Standby topology (off-line). 550/700VA.

- 6 Schuko (DIN) or 6 French (FR) outlets for easy connection of typical computer configurations with peripherals (IEC model also available with 8 outlets)
- HID-compliant USB port (cable supplied), for automatic integration with common operating systems (Windows/Mac OS/Linux)
- Protects telephone, internet and Ethernet line from 'back door' power surges

Eaton Ellipse ECO

Standby topology (off-line).
500/650/800/1200/1600VA.

- EcoControl function: Up to 25% energy saving
- Surge protection compliant with IEC 61643-1 standard
- 4 to 8 local outlets (Schuko, French or IEC)
- USB port and Eaton UPS Companion
- Attractive design with versatile, extra-flat format

Eaton 5S

Line-interactive topology. 500/700/1000/1500VA.

- Delivers clean output with Automatic Voltage Regulation (AVR)
- Compact design that can be deployed as a tower or under a computer monitor
- HID-compliant USB port, for automatic integration with common operating systems

Eaton Ellipse PRO

Line-interactive topology. 650/850/1200/1600VA.

- LCD display for real-time status and measurements
- Delivers clean output with Automatic Voltage Regulation (AVR, with buck and boost)
- EcoControl function helps you save up to 20% energy
- High performance surge-protection device which complies with IEC 61643-1 standard

Network and Server UPS

Eaton SSC

Line-interactive topology. 500 to 1500VA.

- LCD interface
- Sinewave output for compatibility with today's small business servers
- Compact design for easy integration even with space constraints (kiosks, cash machines, ticket machines etc.)
- Up to 8 outlets for better flexibility
- ABM® technology extends battery life by up to 50%
- Serial and USB ports are HID compliant for automatic integration into major OS (Windows/MacOS/Linux)
- Eaton Intelligent Power® Software delivered as standard is compatible with all major operating systems

Eaton EX

Double conversion topology (on-line). 700 to 3000VA.

- Provides more real power (watts) to protect more equipment with a 0.9 power factor
- Multilingual LCD display
- Individually controlled outlets
- Hot swappable batteries, using the HotSwap MBP (Maintenance bypass)
- Long backup time capability
- USB + Serial port and slot for optional Management Cards (Web/SNMP, Contacts, ModBus)
- Eaton Intelligent Power software delivered as standard is compatible with all major operating systems

Eaton 5PX

Line-interactive topology. 1500 to 3000VA.

- Next-generation graphical LCD display (7 languages)
- Energy efficient (up to 99% efficiency) (ENERGY STAR® qualified UPS)
- Energy metering down to the outlet group level
- Switched outlet groups
- Provides more real power (watts) to protect more equipment with a 0.9 power factor
- ABM technology extends battery life by up to 50%
- Long runtime (up to 4 EBM)
- Sine-wave output
- Wide communication offer
- 3 years warranty on electronics, 2 years on batteries

Eaton 9PX

Double conversion topology (on-line). 5 to 11kVA.

- Energy efficient (up to 95% in in online double conversion mode, 98% in high-efficiency mode, ENERGY STAR® qualified UPS)
- Next-generation graphical LCD display (7 languages)
- Provides more real power (watts) to protect more equipment with a 0.9 power factor
- Parallel operation using HotSync technology
- Maintenance by-pass available as standard (on HotSwap/BP version)
- Energy metering – kWh values can be monitored using the LCD or Eaton's Intelligent Power Software (delivered as standard)
- Compatible with Virtual environments (VMware, Hyper-V, Citrix Xen, Redhat)

Eaton 5P

Line-interactive topology. 650 to 1550VA.

- Next-generation graphical LCD display (7 languages)
- Energy efficient (up to 98% efficiency)
- Energy metering
- ABM technology extends battery life by up to 50%
- Switched outlet groups
- Sinewave output
- Wide communication offer (compatible with virtual environment)*
- 3 years warranty on electronics, 2 years on batteries
- Eaton Intelligent Power Software delivered as standard is compatible with all major operating systems

*Optional Network card.

Eaton 9155 1:1, Eaton 9155 3:1

Double conversion topology (on-line).
8 to 10kVA (1:1) and 8 to 30kVA (3:1).

- Optimised to protect modern IT equipment
- Market leading internal battery runtime
- Up to 4 UPSs can be paralleled to increase availability or add capacity using HotSync technology
- ABM technology extends battery life by up to 50%
- Compact and easy to install
- Eaton Intelligent Power software delivered as standard is compatible with all major operating systems

Eaton 9SX

Double conversion topology (on-line). 5 to 11kVA.

- Up to 95% efficiency in online double conversion mode (ENERGY STAR® qualified UPS)
- Next-generation graphical LCD display (7 languages)
- Provides more real power (watts) to protect more equipment with a 0.9 power factor
- Energy metering - kWh values can be monitored using the LCD or Eaton's Intelligent Power Software (delivered as standard)
- ABM technology extends battery life by up to 50%

Datacentre and Facility UPS

Eaton BladeUPS

Double conversion topology (online) on demand.
12 to 60kW.

- Optimised and designed for the Data Centre environment
- Modular and scalable technology (HotSync) adapts to changes easily
- Up to 60 kW with batteries and bypass in a standard 42U rack
- Up to 98.6% efficiency to minimise operating and cooling costs
- Pre-configured solutions available
- ABM technology extends battery life by up to 50%
- Eaton Intelligent Power software delivered as standard is compatible with all major operating systems

Eaton 9355 3:3

Double conversion topology (on-line). 8 to 40kVA.

- Optimised to protect modern IT equipment with 0.9 power factor
- Market leading internal battery runtime
- Up to 4 UPSs can be paralleled to increase availability or add using HotSync technology
- ABM technology extends battery life by up to 50%
- Compact and easy to install
- Eaton intelligent Power software delivered as standard is compatible with all major operating systems

Eaton 93PM

Double conversion topology (on-line). 30 to 200kW.

- Up to 97% energy efficiency in double conversion resulting in significant savings in operational costs
- Energy Saver System (ESS) enables → 99% efficiency across the UPS operating range
- High power density solution with a footprint of just 0.5m², it can provide full rated power and 10-20 minute runtime with internal batteries
- ABM technology extends battery life by up to 50%
- Intelligent Power software delivered as standard is compatible with all major operating systems

Power Xpert 9395 3:3

Double conversion topology (on-line). 225 to 1100kVA.

- The best choice for data centres and large industry applications
- Energy Saver System (ESS) and Variable Module Management System (VMMS) offer highest efficiency even at the lowest loads
- Optimised to protect modern IT equipment with 0.9 power factor
- Up to 4-6 UPSs (depending on power range) can be paralleled to increase availability or add capacity (using HotSync technology)
- ABM technology extends battery life by up to 50%
- Robust manageability is delivered with 10-inch colour touchscreen display

Eaton ePDU® – Intelligent Power® Distribution

Managed ePDUs –

maximum functionality for complete control.

- Monitoring: individual outlet, branch and ePDU - V, W, A and kWh. (Temperature and humidity optional)
- Switching: individual outlet or group, sequencing and cycling with delays
- Control: via Ethernet and advanced LCD screen on the unit

Advanced Monitored ePDUs –

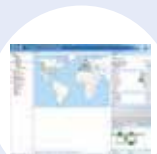

detailed information for efficient operations

- Monitoring: individual outlet, branch and ePDU - V, W, A and kWh. (Temperature and humidity optional)
- Control: via Ethernet and advanced LCD screen on the unit

Switched ePDUs –

remote shutdown and restart of equipment

- Monitoring: V, W, A and kWh for total load and branch. (Temperature and humidity optional)
- Switching: individual outlets, on, off, cycling and sequencing
- Control: via Ethernet and advanced LCD screen on the unit

Eaton Power Management Software

UPS management software for supervision and system shutdown.

- Easy management of multiple UPSs and ePDUs
- Simple to deploy and learn
- Intuitive web-based interface enables access from anywhere in the network
- Integration with VMware vCenter, XenCenter and Microsoft Hyper-V MSCVMM
- Supports NetApp and EMC storage devices Intelligent Power Protector
- Controlled, graceful shutdown of a computer or a server powered by a UPS unit
- Allows work in progress to be saved and data to be preserved

Eaton HotSwap MBP

Universal maintenance bypass for all single phase UPSs up to 11kVA.

- IEC connectors
- Socket or terminal block outputs
- Easy to install

Eaton STS 16

Provides power redundancy to IT equipment.

- Alternative to expensive redundant power supplies from IT vendors
- Compact, 1U rack form factor
- Seamlessly switches from one power source to the other

Eaton RP Series IT Rack

IT Rack 42U/48U.

- Air-tight, optimised airflow to IT equipment
- Split rear doors, quick-release split sides, stepless
- 19" rails, pre-installed grounding system and field-reversible doors
- Modular rack construction with robust welded frame
- High quality, modern designer rack

iStorage Overview

iStorage is the trusted global leader of PIN authenticated, hardware encrypted data storage devices, that include: USB Flash Drives, Hard Disk Drives and Solid State Drive formats. Delivering innovative products to securely store and protect data to Military specified encryption levels, safeguarding your valuable business information whilst ensuring compliance to regulations and directives.

By combining the power of strong, easy to use authentication and hardware data encryption, iStorage provide the highest level of protection available against theft or loss of confidential data.

iStorage®

diskAshur2

- USB 3.1 Portable Encrypted Hard Drive
- Capacities: 500GB – 5TB
- FIPS PUB 197 validated
- AES-XTS 256-bit hardware encryption – no software required
- OS & Platform independent
- Employs EDGE Technology
- Available in 4 colours: Phantom Black, Ocean Blue, Fiery Red & Racing Green

diskAshur2 SSD

- USB 3.1 Encrypted Portable SSD
- Capacities: 128GB – 4TB
- FIPS PUB 197 validated
- AES-XTS 256-bit hardware encryption – no software required
- OS & Platform independent
- Employs EDGE Technology
- Available in 4 colours: Phantom Black, Ocean Blue, Fiery Red & Racing Green

diskAshur Pro2

- USB 3.1 Encrypted Portable Hard Drive
- Capacities: 500GB – 5TB
- NCSC CPA (UK) & NLNCSA BSPA (NL) – Certified
- NATO Restricted level Certified
- FIPS 140-2 level 3 certification pending
- AES-XTS 256-bit hardware encryption – no software required
- OS & Platform independent
- Employs EDGE Technology

diskAshur Pro2 SSD

- USB 3.1 Encrypted Portable SSD
- Capacities: 128GB – 4TB
- NCSC CPA (UK) & NLNCSA BSPA (NL) – Certified
- NATO Restricted level certified
- FIPS 140-2 level 3 certification pending
- AES-XTS 256-bit hardware encryption – no software required
- OS & Platform independent
- Employs EDGE Technology

diskAshur DT2

- USB 3.1 Desktop hard drives
- Capacities: 1TB – 12TB
- NCSC CPA, NLNCSA BSPA certified
- Certified to NATO Restricted level
- FIPS 140-2 level 3 certification pending
- FIPS PUB 197 certified
- AES-XTS 256-bit hardware encryption – no software required
- OS & Platform Independent

datAshur®

- USB 2.0 Flash Drive
- Capacities up to 32GB
- FIPS 140-2 Level 3 certified - Cert. No. 1873
- FIPS PUB 197 certified
- IP57 certified - water/dust resistant
- AES 256-bit Hardware encryption - no software required
- OS & Platform independent
- Winner of UK IT Industry Awards 2013

datAshur Pro®

- USB 3.0 Flash Drive
- Capacities up to 64GB
- FIPS 140-2 Level3 validated - Cert. No. 2688
- NLNCSA DEP-V
- FIPS PUB 197 certified
- IP57 certified - water/dust resistant
- Certified to NATO Restricted Level
- AES 256 bit hardware encryption - no software required
- OS & Platform independent

datAshur Personal2®

- USB 3.0 Flash Drive
- Capacities up to 64GB
- FIPS PUB 197 certified
- Bootable drive
- AES-XTS 256-bit hardware encryption - no software required
- OS & Platform independent

Opengear Overview

Opengear provides enterprise companies with next generation smart solutions for managing and protecting their critical IT and communications infrastructure.

Providing customers with the security, the automation and the resilience necessary to operate efficiently, reduce costs and ensure business continuity.

Opengear have raised secure remote access and infrastructure management to a new level with their Smart OOB out-of-band management and Failover to Cellular technologies.

Their smart solutions are deployed in central and remote site environments worldwide, alongside critical IT, communications, network and power infrastructure. They provide remote troubleshooting and remediation to minimise disruption and deliver always-on resilient connectivity.

Opengear Infrastructure Manager

The Opengear IM7200 is a state of the art infrastructure management solution which streamlines remote management of network, server and power infrastructure in datacentre and remote environments, ensuring business continuity, secure and reliable access, monitoring and control for local and remote operations teams. The next generation IM7200 combines Smart OOB out-of-band management with Failover to Cellular and delivers.

Opengear Remote Site Gateway

The Remote Site Gateway features our industry leading SmartOOB management solution in a compact form factor. The Remote Site Gateway can be paired with any existing connections and installations to easily add OOB management without the need for replacing existing equipment. SmartOOB ensures you have visibility, secure access and the ability to remediate your network devices without costly onsite staff or expensive truck rollouts.

Opengear Console Server

The Opengear CM7100 is a highly reliable and feature-rich console server that simplifies out-of-band management of your network, server and power infrastructure in datacentres and remote sites. Powerful monitoring, diagnostics and remediation features enable efficient recovery from infrastructure fault conditions and maximize uptime. An intuitive dashboard with pro-active alerting provides Network and IT administrators with real time status.

Opengear Lighthouse Centralised Management

The Opengear Lighthouse solution builds on the capabilities of Opengear's Datacentre and Remote Site Management appliances, to provide a single point of management for your entire out-of-band infrastructure.

Opengear Resilience Gateway

The Opengear Resilience Gateway ensures uptime at branch offices and remote sites. Identify and remediate issues at the network edge before they become failures, with Smart OOB. Maximize WAN resilience with Failover to Cellular to 4G LTE networks and built-in Multicarrier capabilities. Scale from small retail shops to large, distributed networks with Lighthouse Centralized Management.

Opengear Environmental Monitoring Device

The Opengear environmental monitoring device plugs into the serial ports on our console servers and enables you to remotely monitor environmental conditions using a standard Web browser. You can view the ambient temperature and humidity of the remote environment and set the EMD to automatically send alarms progressively from warning.

Vertiv Overview

IT Managers of Data Centres and Enterprises are today facing increasing challenges; higher density of IT infrastructures, multiple suppliers for multiple critical equipment - power, cooling, racks, cabling and energy efficiency issues.

Vertiv's broad technology offering and expertise support a full spectrum of enterprise-wide solutions for today's vital business needs.

Vertiv IT Monitoring, Control & Management solutions offers critical continuity to keep businesses going strong.

Avocent Advanced Console Server

The Advanced Console Server provides high network availability with a single point of authentication, secure remote access either through the IP network or via an alternate out-of-band network access when the primary network is down. Secure remote access to console ports of servers, routers, switches, firewalls and serial power devices featuring strong encryption with advanced security.

Avocent Universal Management Gateway

The Universal Management Gateway is always on, always available and accessible from wherever, whenever. The first converged single-U management appliance that enables true, real-time, integrated monitoring, access and control and management of datacentre systems and devices through Service Processor, KVM or serial.

Avocent ACS 800 Serial Console

The Avocent ACS 800 serial console system takes Vertiv's renowned enterprise-class technologies utilized in data centers around the world and packages the key features into an exciting compact and cost-effective form factor. The ACS 800 provides serial access, environmental monitoring, IoT integration and remote networking capability to edge-oriented market sectors including financial institutions, retail chains and education.

Avocent LCD Local Rack Access Console

Providing an installed and integrated access point in the datacentre, saving time for datacentre employees by ensuring immediate access to multiple servers making software upgrades, troubleshooting and system monitoring convenient and less time-consuming, in only 1U of rack space.

Avocent MergePoint Unity Digital KVM Switch

The MergePoint Unity helps to minimise downtime through a unified approach that provides IT administrators a faster method to diagnose, reconfigure or restore equipment. Advanced Remote Management provides secure and remote, out-of-band connections directly to the physical KVM, USB and serial ports.

Avocent AutoView KVM Switch

Built for small datacentres and remote/branch office environments, this analog KVM switch is used to control and access your servers. The Avocent AutoView KVM switch portfolio provides local management and control of server resources all from a single console.

Avocent Secure Switch

The Avocent HMX Digital High Performance KVM system is designed for organizations that need to provide workers the ability to seamlessly access and share one or more computing resource(s) which are physically separated from their work environment. This solution provides users an “at-the-desktop” experience from their work stations to any appliances, PCs or computing resources attached to the HMX IP network.

Avocent Matrix Digital High Performance KVM System

The Matrix KVM Switch is ideal for Control Rooms, featuring a digital, direct connect solution that provides a scalable environment through the use of proprietary switches, providing guaranteed performance quality. Enables a pixel-accurate, lossless video experience with lag-free, real-time interaction to computing equipment via any USB enabled device.

Avocent SwitchView KVM Switch

Avocent Desktop KVM switches bring order to desktop chaos. Whether you have a business with limited IT resources or a department in a large organization, these KVM solutions simplify access to essential business systems. Each switch supports a wide range of peripherals and up to four different systems. By pushing a button, users gain instant access to multiple computers - all through a single monitor, keyboard and mouse.

Avocent LV High-Performance KVM Extender System

The LongView series has been designed to provide industry-leading video clarity, compatibility and high rack densities. Delivering sharp, bright and high resolution video images and high quality audio for single and multi-screen desktops at distances up to 300m.

Avocent HMX High Performance KVM Switch

The HMX Digital KVM system is designed for organisations that need to provide workers the ability to seamlessly access and share one or more computing resource(s) which are physically separated from their work environment. This solution provides users an “at-the-desktop” experience from their work stations to any appliances, PCs or computing resources attached to the HMX IP network.

Liebert GXT4 - Single Phase 700-10,000 VA UPS

Recommended to protect mission-critical equipment, Liebert GXT4 is a true on-line UPS that delivers continuous, high-quality AC power with no break when transferring to battery. It protects equipment from all power disturbances due to blackouts, brownouts, sags, surges or noise interference.

Liebert PSA - Single Phase 500-1500 VA UPS

Cost-convenient line-interactive UPS that offers full-featured power protection for small office computers and electronic equipment. Liebert PSA offers unique features and extraordinary performance not normally found in similar products in this price range.

Liebert PSI - Single Phase 750-3000 VA UPS

Liebert PSI is a compact, line-interactive UPS system designed especially for IT applications such as network closets and small datacentres. The flexible design of Liebert PSI allows the unit to be configured as a self-standing tower or to be rack-mounted within a 2U space.

Liebert PSP - Single Phase 500-650 VA UPS

Cost-convenient, full featured UPS that delivers cost-effective power protection in a compact package. The UPS provides battery-backed sockets and a surge protection-only socket. The UPS battery offers four minutes of backup power at full load – ample time to shut down protected equipment if an outage occurs.

Liebert PSI-XR - Single Phase 1000-3000 VA UPS

Liebert PSI-XR is a compact, line-interactive UPS system designed especially for IT applications such as network closets and small datacentres. The flexible design of allows the unit to be configured as a self-standing tower or to be rack-mounted within a 2U space. It is available in four capacities, in both 230V or 120V models.

Liebert APS - Single & Three Phase 5-20 Kva UPS

The Liebert APS is an on-line, modular UPS that provides mission-critical availability while reducing costs and maintaining flexibility for the future. With single phase output UPS and both single and three phase input options to provide both high availability and flexibility.

Liebert EXS Three Phase 10,15, 20 kVA UPS

Optimised and Integrated Three-Phase Ups Solution with High Efficiency Power Protection.

Vertiv MPHC

Metered & Outlet Switched Rack PDU.

Liebert ITA2 Three Phase 10,15, 20 kVA UPS

Remarkable Efficiency and Flexibility Characterise the Liebert ITA2 UPS Family.

Vertiv MPHM

Outlet Metered Rack PDU.

Vertiv MPHR

Outlet Metered & Switched Rack PDU.

Vertiv MPHB

Metered Rack PDU.

Vertiv Rack Power Manager

Standalone Rack Power Management software solution with capacity to handle up to 2500 Vertiv rack PDUs. Power monitoring and automatic alerts, historical power and energy consumption reports – canned and custom; scheduled and snapshot.

Vertiv Power Assurance Package

Ensure business-critical continuity with comprehensive protection and vital support for Liebert UPS.

Vertiv Datacentre Planner

Simplifying datacentre management with intuitive planning and design capabilities, enabling visualisation of the infrastructure using real-world power data.

Vertiv Distribution Assurance Package

Ensure power system availability with expert support for Vertiv rack PDUs.

Avocent DSView Management Software

Enables remote access to servers and the network infrastructure, providing detailed event tracking, session logging and alerting, securely and conveniently combining access to out-of-band and in-band services.
