# Government: Threats are on the rise.

**Smaller agencies and local government departments** are the most at risk from a data breach, reflective of smaller budgets and IT security teams.[1]

**The average cost of a data breach** in the US public sector industry was

$**1.08M**[2]

### Get protected.

Help protect your screens and the confidential data on them with a privacy filter from 3M. 89% of U.S. IT experts agree privacy filters are an easy to implement, first line of defense against visual hackers.[3]
