

2kg Dry Powder Fire Extinguisher

General Features

- Pre checked and ready for mounting
- Light weight aluminium
- Eco-Foam, which has a reduced impact on the environment.
- Safety pin to reduce inadvertent discharge
- Pressure gauge to indicate internal pressure
- Supplied with wall mounting bracket
- Fully refillable and serviceable
- Spare parts available

The 2kg ABC Dry Powder extinguisher is a multi-purpose extinguisher ideal for domestic use and suitable on (Class A, B and C) fires involving combustible solids, flammable liquids and gases. The highly-rated extinguishant is Mono-Ammonium Phosphate, which is a fine powder that can knock down flames quickly and protect users against the radiant heat from a fire.

Whilst it is safe for use on electrical fires, it should be noted that it can cause contamination of sensitive equipment / environments and corrosion of electrical components if not meticulously cleaned.

The ABC Dry Powder extinguisher is also very useful in outdoor areas and vehicles, where freezing temperatures can adversely affect liquid-based extinguishers. Manufactured in accordance with EN3, our 2kg ABC dry powder extinguisher also carries the CE mark and is independently tested to BSI (British Standards Institution).

Also available in 1kg, 3kg, 6kg and 9kg versions. Usually dispatched within 2 – 3 working days. **Ready for Mounting

For peace of mind, all our portable fire extinguishers are pre weighed, checked and labelled in accordance with Irish Standard 291:2015 prior to dispatch from our warehouse.

Extinguishers should be commissioned on site by a competent person. Fire products direct has a nationwide network of qualified engineers.

If you require assistance with on – site installation, certification or maintenance, get in touch with one of our fire safety experts who will be happy to arrange a site visit for you.
